ACADEMICS

Muhammad Usman Afzal
Research Associate
School of Engineering
Macquarie University

Research fields: Electromagnetics antennas;
microwave communications

Latest research projects: A low-cost and low-profile antenna design that could provide uninterrupted on-the-move broadband internet connectivity via satellite. The outcomes of the projects could provide internet access to ~4 billion people around the world who have poor or no internet connectivity.

Subjects: Engineering

Professional memberships and achievements:

- Member of the Institute of Electrical and Electronic Engineers
- Member of the Antennas and Propagation Society
- Recipient of International Macquarie Research Excellence Scholarship

Recent publications:

- Not provided

University profile: Not provided

Dr Jan A. Ali
Senior Lecturer in Islam and Modernity
School of Humanities and Communication Arts
Western Sydney University

Research fields: Sociology

Latest research projects: Global City Formations and Transformations: The Case of the Global City of Sydney

Subjects: Religion and society
